

Fishbowl Inventory 2010.3 Released!

Fishbowl Inventory now automatically finds and gets you the best deals from vendors.

Manage Vendor Cost Rules

When you buy large quantities of inventory from suppliers, you can often get better per-item prices. That's a savings which goes directly to your bottom line! But when you need inventory soon, you may not have time to figure out the quantity needed to get the best volume discount. That's where Fishbowl comes in.

Fishbowl Inventory 2010.3 let's you manage all of your vendor price information so that you're sure to pay the lowest possible price every time! When creating a Purchase Order, Fishbowl will alert you if adding just a few more units will bring down your per-unit price and save you money. Also, every Purchase Order now displays the vendor's minimum order amounts. This helps you build and issue orders in volumes that save you money on shipping and freight. By taking advantage of volume discounts and setting dollar amount thresholds, you'll be sure to decrease your inventory costs.

Other Updates In 2010.3

In addition to finding you the best deals from your vendors, this release of Fishbowl Inventory 2010.3 includes the following upgrades:

- Configurable parts can now be added to a PO, RMA or SO credit return.
- A shortage warning has been added to the MO finish wizard.
- Partially picked items are marked in the WO finish wizard.
- A New Production report was created.
- A "Check Version" option has been added to the Right Click of the Fishbowl Server tray icon.

- When you follow the server link to check updates, you don't have to fill out the download form.

If you have questions about getting the new version, call 800-774-7085 ext. 3 or email support@fishbowl-inventory.com

Recommended Steps to Upgrade Fishbowl

1. On the Server computer, close the Fishbowl Client and exit the Fishbowl Server.
2. Make a copy of your database (usually in the data folder in the Fishbowl directory). If you have images or custom reports you will want to copy those as well.
3. Install the new version of Fishbowl on the Server computer. Run the Fishbowl Server and wait until the database update is complete.
4. Install the new version on all of the Client computers with the "Quick Client" option.

If you have questions about upgrading, call 800-774-7085 ext. 3 or email support@fishbowlinventory.com
