

Fishbowl Partners with eFileCabinet to Eliminate Complicated Documentation Processes

-Software integration reduces costs and data errors while increasing productivity-

SALT LAKE CITY, August 3, 2011— Fishbowl® (www.fishbowlinventory.com), the No. 1 requested [inventory solution for QuickBooks](#), today announced a partnership with eFileCabinet, Inc., a leading provider of [electronic document management software](#). Both companies will offer each other's products immediately and are working toward an integration to be launched at the Intuit Summit 2011 conference in October.

"As Fishbowl continues to grow, we are developing new ways to make [inventory management](#) convenient for our customers," said David Williams, Fishbowl CEO. "Through this agreement with eFileCabinet, Fishbowl users will be able to reduce unnecessary labor and costs that come from complicated manual and paper-based processes."

Fishbowl partnered with eFileCabinet for the same reason it originally created Fishbowl Inventory: to eliminate complicated systems that are susceptible to human error. Many businesses often type the same information into multiple software programs when documenting inventory activity. The partnership with eFileCabinet will cut down the time spent entering data and the mistakes that often result from multiple entries.

"This is a great partnership because Fishbowl and eFileCabinet are dedicated to making business easier," said Matt Peterson, eFileCabinet President and CEO. "We know problems can arise from the dual entry of data into multiple software programs. Because both companies already seamlessly integrate with QuickBooks, it makes the future integration of Fishbowl and eFileCabinet a perfect solution."

Until the integration is released in the fall, Fishbowl customers can order the eFileCabinet features by calling their account manager at 1-800-774-7085.
