

**AN E-COMMERCE INVENTORY
 MANAGEMENT SOLUTION**

Keep your sales channels in sync and streamline your inventory processes by using Fishbowl Commerce™ (FBC) to connect on-line shopping carts and e-commerce platforms seamlessly with Fishbowl Manufacturing® (FBM) or Fishbowl Warehouse® (FBW) and give your business advanced inventory features.

FBC, part of Fishbowl's business automation platform, does all of the work to keep your inventory in sync across all of your connected channels and then automatically import orders into FBM or FBW to be picked, packed, and shipped. With FBC you can:

- *Manage your channels, all in one place.*
- *Add new marketplace and shopping cart integrations within minutes without the need for a custom integration.*
- *Manage all of your selling channels, orders, and inventory from one FBC account.*
- *Sync inventory in real time—when an order comes in from one of your connected sales channels, FBC will immediately push out an inventory update to all other channels where that product is listed.*
- *Keep your customers happy by having a real-time inventory sync, which helps to eliminate the risk of overselling and mis-managing your inventory.*
- *Sync multiple selling accounts—do you sell on 3 eBay stores, 2 Amazon accounts, and 2 Magento stores? No problem. Easily connect all of your marketplace accounts and shopping carts with FBC. We'll keep them all in sync.*

ORDER VOLUME PRICING

Pricing is based on monthly order volume and includes unlimited connected sales channels.

Call **1.800.774.7085 ext. 2** to set up a personalized product overview or visit www.fishbowlcommerce.com/ for more information or to get started.
