

Fishbowl believes every small to midsize business can have the level of mobile inventory control solutions large organizations enjoy. Avoid the expensive ERP solutions and find out if Fishbowl fits the bill by considering the following scenarios.

NEED: Accurate real-time inventory with value for ease of financial close (annual/quarterly/monthly)

- Q:** Does your company track its real-time inventory levels and values to know when to reorder items and generate month-end reports?
- A:** Fishbowl provides advanced inventory control and is built on an SQL database that allows users to see detailed inventory information and run reports in real time.

NEED: Reduce scrap/salvage/shrinkage

- Q:** Are scrap and salvaged inventory accurately measured and accounted for all the way through the stages of inventory from receiving to pick, pack, and ship?
- A:** Fishbowl's Picking and Receiving modules lead to fewer errors in logistics. It offers Cycle Count processes, Scrap and Adjustment capabilities with an audit trail, as well as no inventory overrides and better inventory reporting.

NEED: Minimize excess and obsolete inventory

- Q:** For each SKU, do you know the preferred inventory levels, depletion rates, and inventory turns?
- A:** Fishbowl has MRP capability via solid usage reports, forecasts, min/max levels, auto purchasing, turnover and aging reports, and a Forecasting module.

NEED: Track items/inventory across multiple physical and/or virtual warehouses

- Q:** Can your inventory/sales system set defaults for the preferred inventory location to pull from and create predetermined transfer orders to move inventory from one location to another?
- A:** Fishbowl has a Location Group module and a Bin Location module for unlimited locations. Check levels and status per location, and sort or modify reports by location. Transfer and Move features allow for easy management.

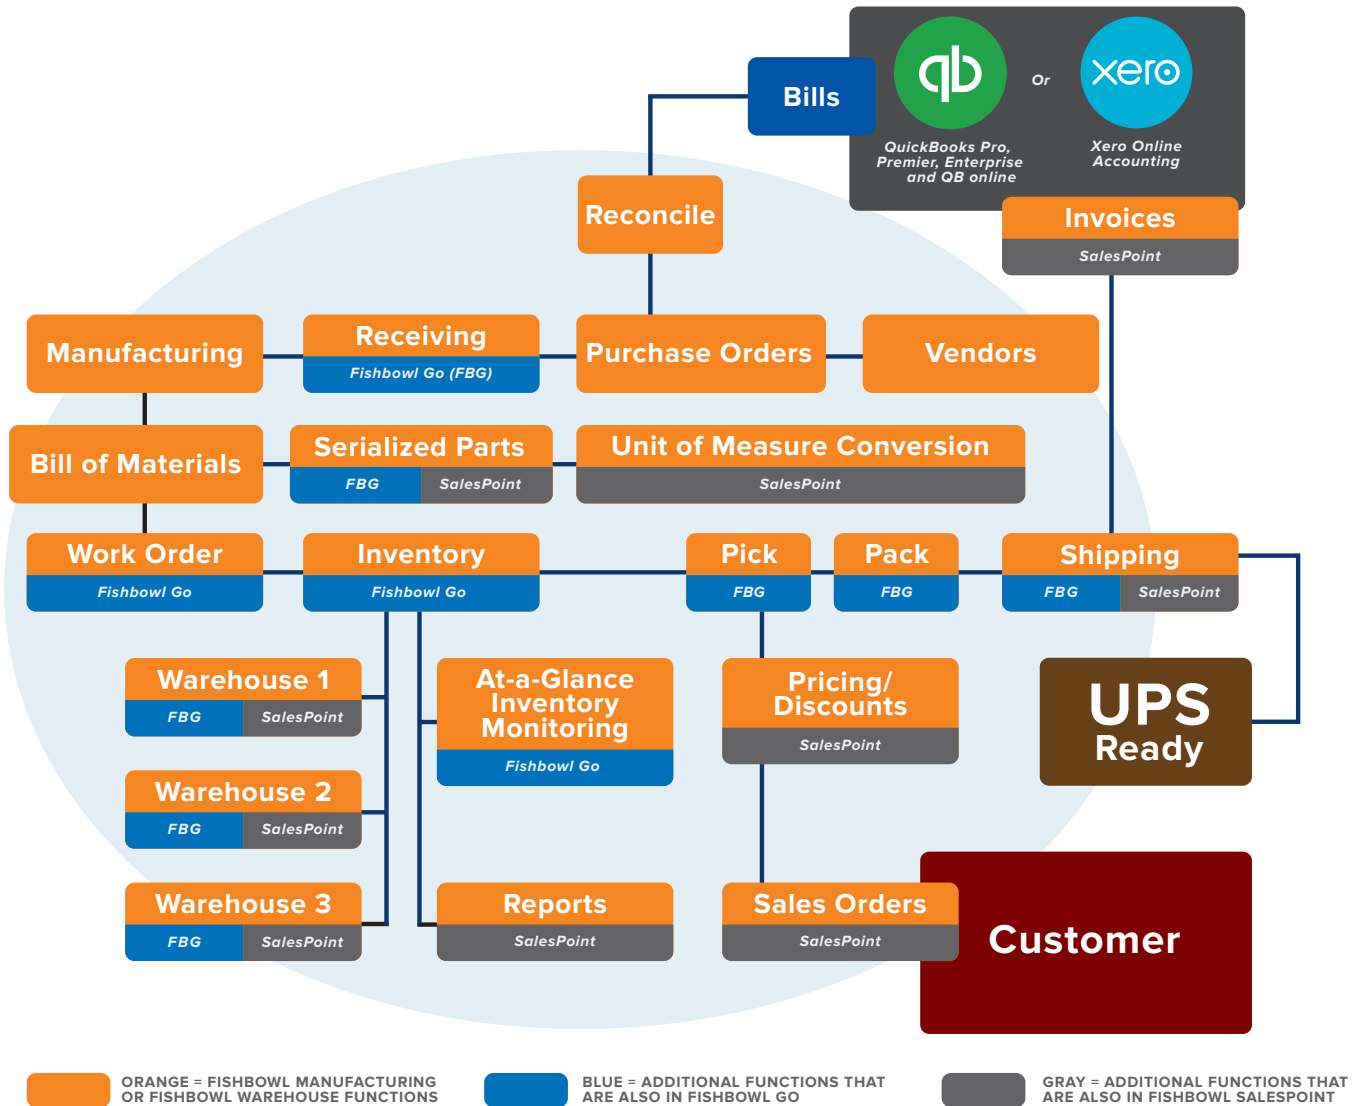

ERP Avoidance

Assessment Questions:

- Do you have difficulty with the QuickBooks year end close with regards to Inventory?
- Do you have problems providing Inventory Valuation at any given time?
- Are there problems with Scrap, Excess Inventory or Obsolete Inventory?
- Are there issues with managing inventory in multiple locations and warehouses?
- Are you facing any external reporting requirements or external compliance issues?
- Do you have data weaknesses?

If you answered "yes" to any of these questions, you will benefit by connecting with Fishbowl to evaluate the possible solutions. Please connect with your **Fishbowl Solution Specialist to set up a free consultation by calling 800-774-7085 ext. 2.**
