

**Fishbowl ShipExpress is a free plugin for Fishbowl Manufacturing®** and Fishbowl Warehouse® that allows users to integrate with popular shippers like UPS, DHL, FedEx, USPS, and other national, international, and regional carriers. It is available on the latest versions of the Fishbowl software, beginning with 2017.1.

Once activated, ShipExpress becomes a module within Fishbowl, and it also adds new shipping functionality to other modules. Fishbowl has partnered with Shippo to waive all SaaS fees associated with its shipping labels for Fishbowl users. After you get a Shippo account, you will gain access to exclusive discounts on shipping labels and much more.

**The following shipping features are currently available in Fishbowl through ShipExpress:**

- **Waived Shippo Fee** – Shippo will permanently waive its customary 5-cent software service fee for each shipping label. This is an exclusive offer for ShipExpress users.
- **Batch Shipping** – Ship as many items as you like at the same time to different customers rather than having to ship them one at a time.
- **Improved Shipping Rate Quotes** – Using a product’s weight and dimensions, you can get shipping rate quotes from various shippers using a number of shipping methods via improved purchasing dialogs.
- **Updated Shipping Labels** – After you select a shipping method and carrier in the updated shipping label tool, you can print out the appropriate shipping labels to attach to your packages.
- **Signature Confirmation** – Ensure packages are received by the right people at the expected times by obtaining signature confirmation.
- **Shipping Insurance** – If you are shipping particularly valuable items, you might consider purchasing shipping insurance via ShipExpress.
- **Shipment Tracking** – Make sure items reach their final destination and resolve logistical issues when they arise by tracking the progress of your shipments.

- **Bulk Address Validation** – During the shipping process, you can check many customers' addresses and see if they are valid or if they may have been entered incorrectly.
- **USPS Commercial Plus Pricing** – Get discounted shipping label prices with USPS Commercial Plus Pricing.
- **Refund Requests for Unused Labels** – If you don't wind up using a shipping label after you've paid for it, you can easily request a refund.
- **No Integration Cost** – Shipping solutions like ShipStation and Endicia require monthly fees to maintain, but ShipExpress offers essentially the same features as those other solutions at no cost.
- **Quickship** - Save money with discounted rates from Fishbowl ShipExpress using Quickship, allowing you to see the lowest cost label available, based on cost or carrier and service, in one easy click. It's really fast!
- **Shipment Extras** - We've also added Shipment Extras to give you control of how you want your shipment done such as purchase insurance, use of retail rates, signature confirmation and more!
- **International Shipping** - We also give you the ability to auto-update customs declarations, allowing you to save valuable time instead of re-entering the same information over and over again.

***Fishbowl ShipExpress continues to add new features to the ones listed above. Take advantage of its extensive feature set to get the most out of Fishbowl's shipping capabilities!***
